

Community Action Plan

The CAP is prepared approximately every two years and is developed during a two-day conference by the installation's team of helping agencies and their partners, collectively known as the IDS, for approval by the CAIB. The resulting plan contains a set of specific outcomes to be achieved and supporting action initiatives to guide the CAIB and IDS in supporting JB MDL Total Force and family self-sufficiency in meeting their base mission responsibilities and personal needs. The IDS will report CAP progress at all respective CAIB meetings.

Mission Statement: A living road map for focus and shared efforts aimed at valuing Service-specific cultures while improving resilience, readiness, well-being and quality of life among the Total Force and their family members at JB MDL.
