

PHYSICAL THERAPY CLINIC

We provide physical therapy services to our active duty Joint Base warriors during normal duty hours. We require referrals and appointments for an initial physical therapy evaluation.

Appointments can be scheduled through the Appointment Line or at the Family Health Clinic kiosk for routine and acute care services. A handwritten prescription from the PCM is acceptable for walk-in services, such as issuing crutches/canes and braces (no evaluation). Services available include a wide spectrum of orthopedic and sports physical therapy interventions. At this time, we do not provide pediatric, cardiac, or long-term physical therapy services. Patients should change into shorts and a t-shirt before the start of the appointment. Referrals beyond our scope of care or our access capacity will be routed to an off-base provider by the Referral Management Center.
